The Fry word list or 'instant words' are widely accepted to contain the most used words in reading and writing. The list is divided into ten levels and then divided into groups of twenty-five words based on frequency of use and difficulty. Sight words make up 50 to 70 percent of any general text. Learning sight words helps students to become efficient and confident readers. Students who learn their sight words can focus their efforts on "learning to learn" rather than "learning to read."
