

The Essential Partnership of the Board and the Superintendent

“The evidence is in. High impact school boards that provide their districts with the kind of leadership that makes a real difference in these challenging times never go it alone. They always work in close partnership with their superintendent, as members of a true strategic leadership team.”

“As close collaborators, your board and superintendent make sure that you and your board colleagues play a meaningful role in the governing process ... you and your board colleagues work with your superintendent as a cohesive team in making the judgments and decisions that promote student success and keep your district on a sound footing – financially, administratively, and politically.”

“Your school system’s success is proof positive of a true board-superintendent team at work.”
